

GPU PC with CSLab's preinstalled image of Windows 10 setup guide

When you boot up your PC, you will see the local account with username: *research*

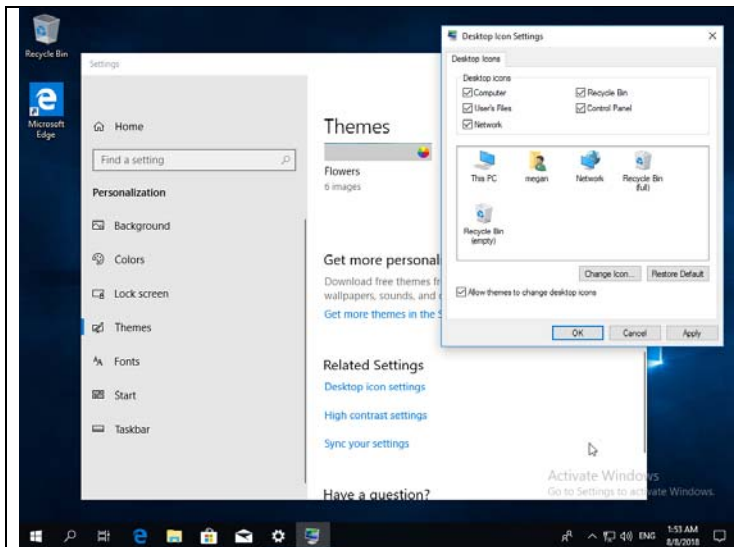

Please login with password: *csphdcsphd*

This is also your local administrator account.

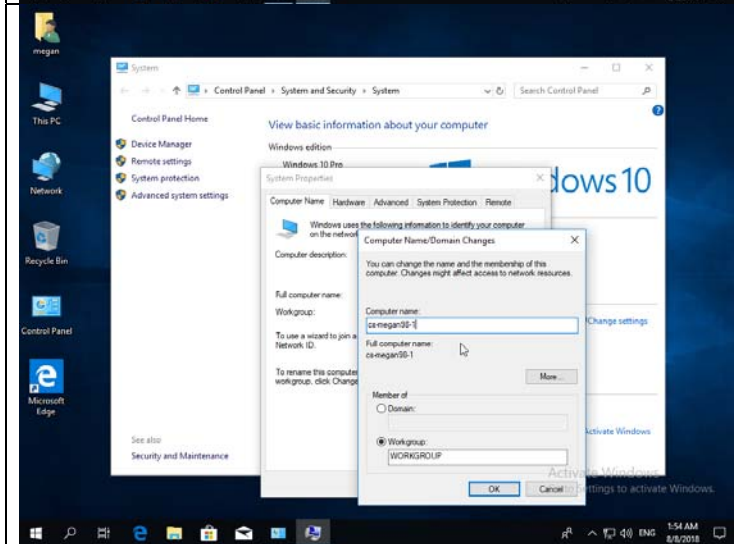

This is a very important account, you are strongly recommended to change this password (and remember it) after setup. This account is the last chance to login if there is any network error, save mode rescue or loss of domain connections.

After you finished setup your PC with domain account and printer settings, you can change password of the local administrator account *research* by:

1. Click Windows Start button
2. Enter *compmgmt* to open Computer Management
3. Click Local Users and Groups > Users
4. Right click *research*
5. Set Password
6. Proceed

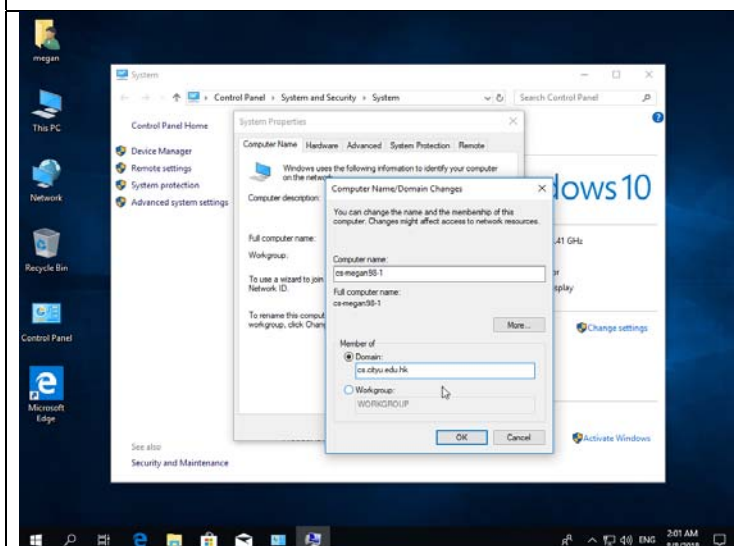

You can personalize you desktop icon by right click anywhere on desktop

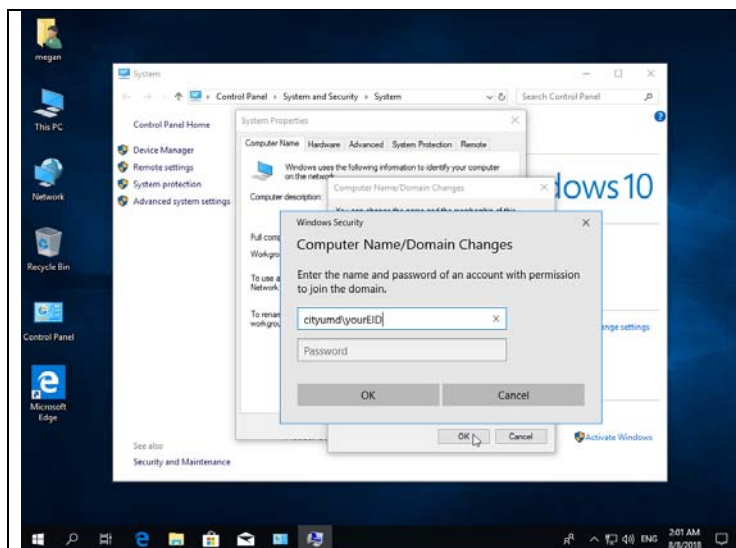

Right click *This PC* > *Advanced system settings* > *Computer Name* to change your computer name. Please use this format : *cs-yourEID-x* *cs:initial, x:the order of your PC* e.g. 1 is the first PC, 2 is the second PC, etc e.g. *cs-megan95-1* is the first PC of user with EID *megan95*

Restart your computer then

After reboot, go to above same page again and join domain

cs.cityu.edu.hk

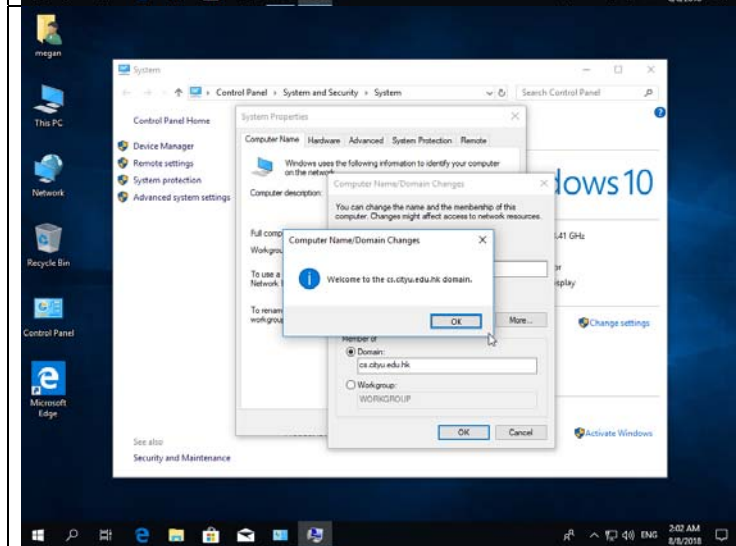

Enter your EID in form of

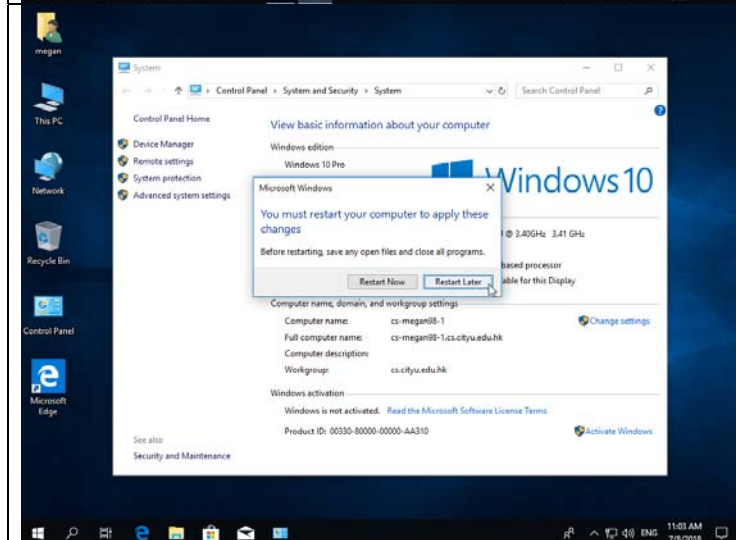

cityumd\yourEID

with your EID password

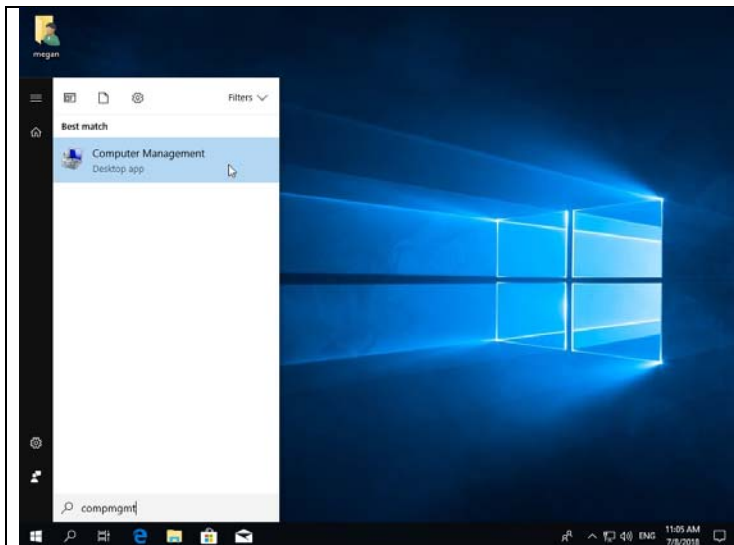

to join domain

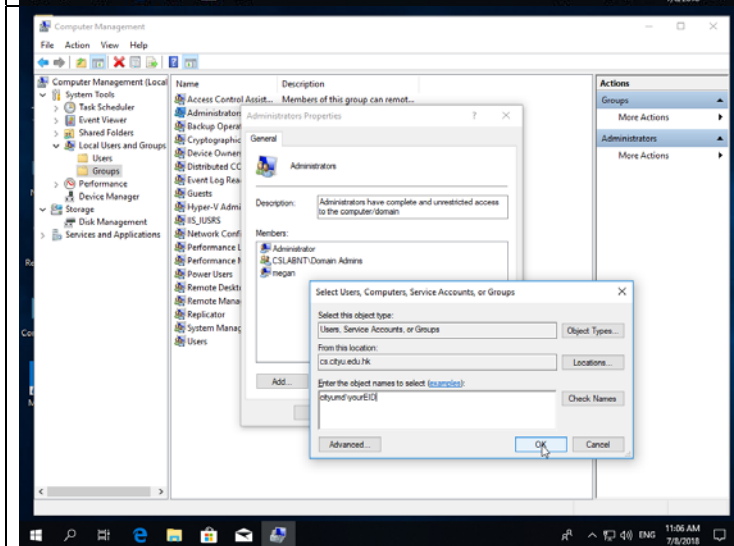

Message will be shown if joined successfully

Don't restart computer

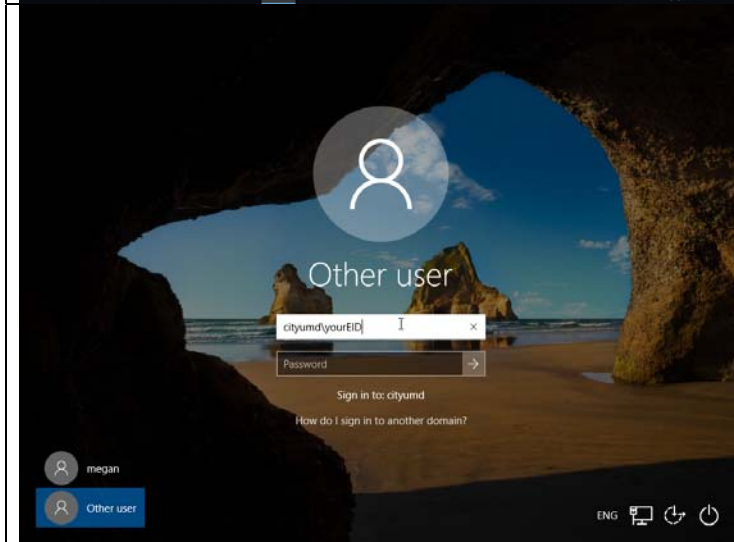

Click Windows Start button and enter *compmgmt* to open Computer Management

Open *Local Users and Group > Groups > Administrators* and click **Add** to put your EID into administrators group :

cityumd\yourEID and also *cityumd\csjlee* (for Jimmy, when you need support)

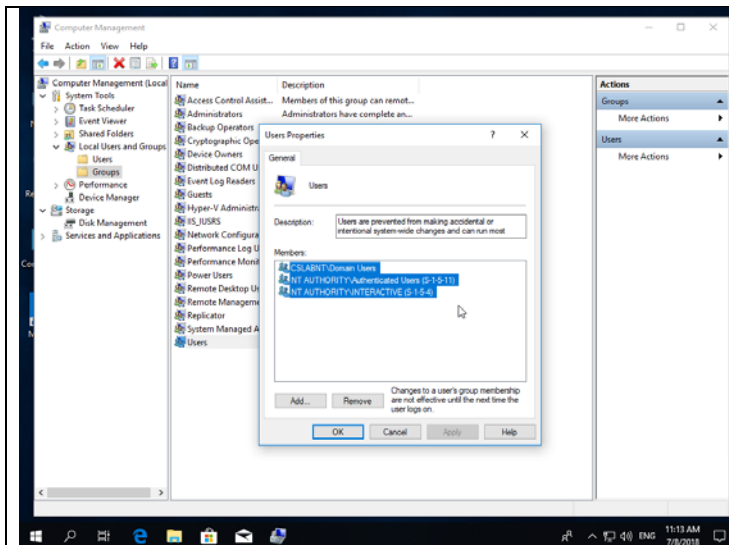

Restart your computer then

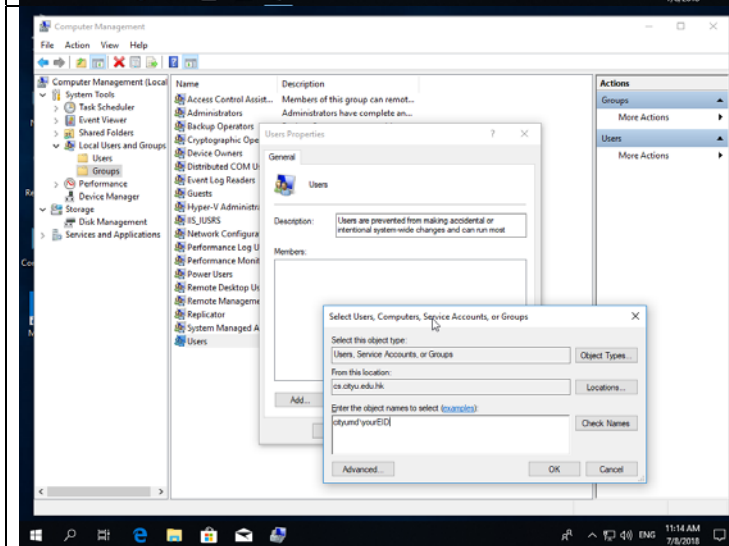

After reboot, click *Other user* and login with

cityumd\yourEID

with your EID password

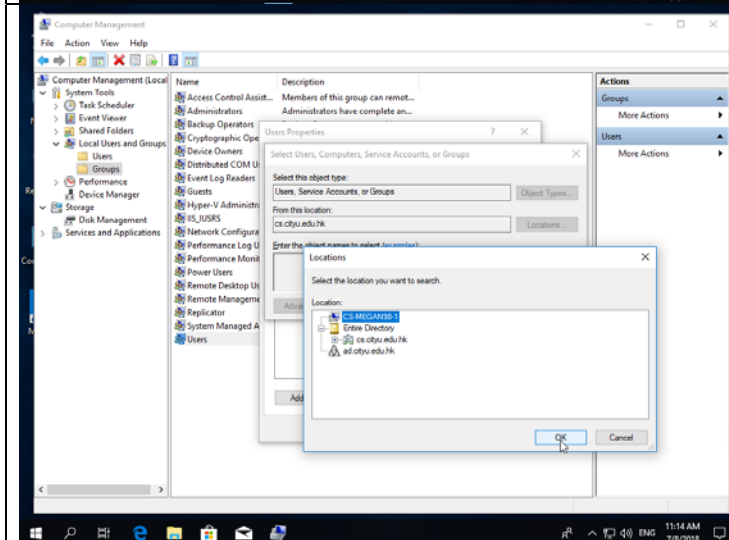

Open Computer Management again,
Open *Local Users and Group > Groups > Users*, remove all users
inside

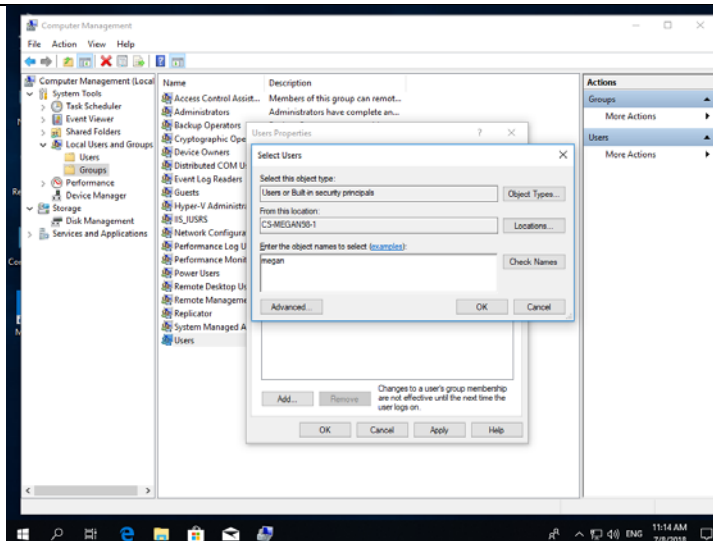

Add your EID into Users group by
Add

cityumd\yourEID and also
cityumd\csjlee

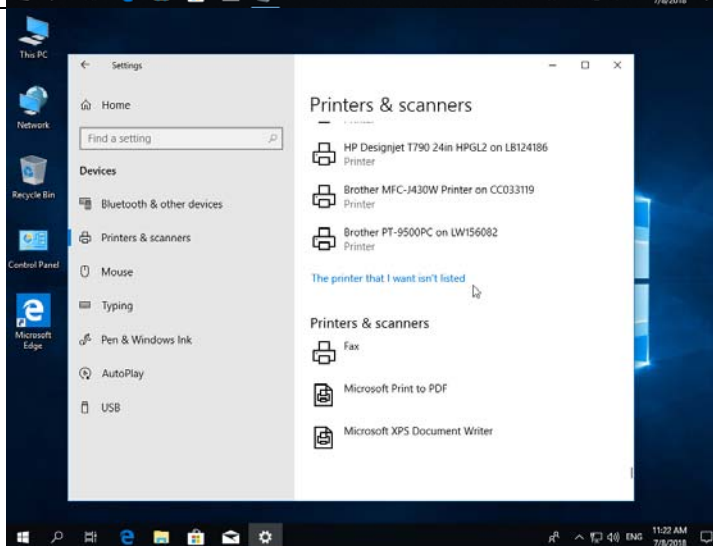

Click OK

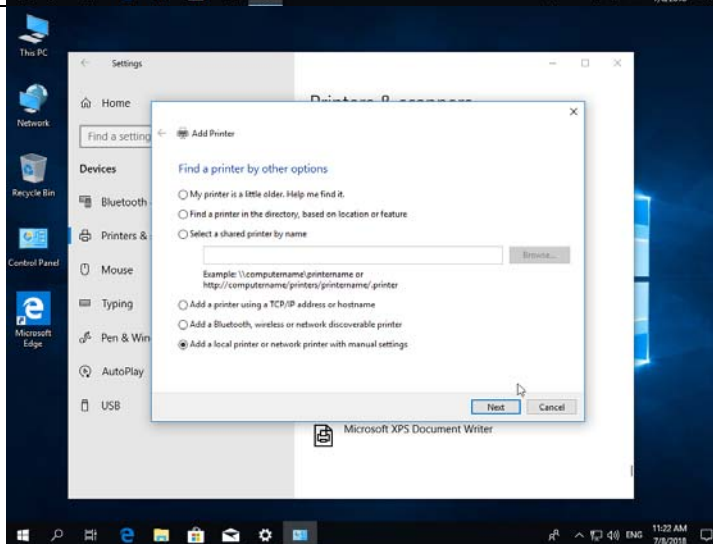

Click *Add*, *Location*, click your
computer name and OK

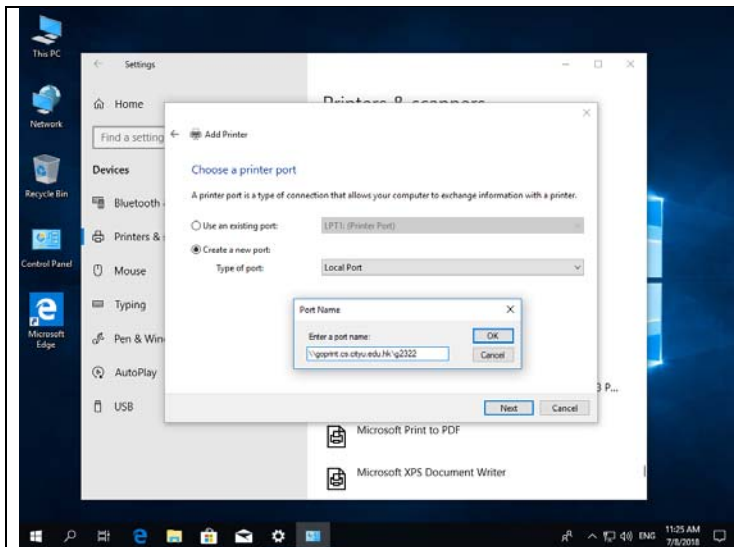

Enter your local user account, **research**, into Users group, then click OK to finish.

Click Windows Start button and click **Settings > Devices > Printers & scanners > Add Printer or Scanner**, choose **The printer that I want isn't listed**

Click **Add a local printer or network printer with manual settings**

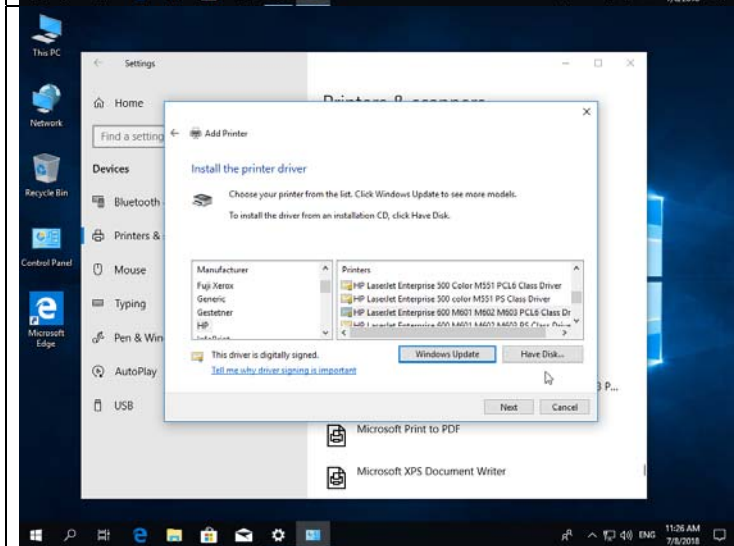

Click **Create a new port, Local port** and enter the port name, which is showing on the printer. If the label is not starting with

\\goprint.cs.....

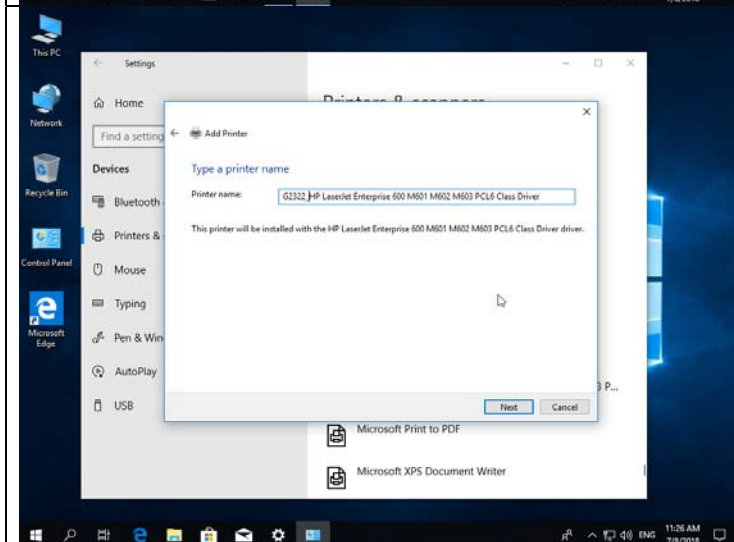

Please enter with

\\goprint.cs.cityu.edu.hk\....

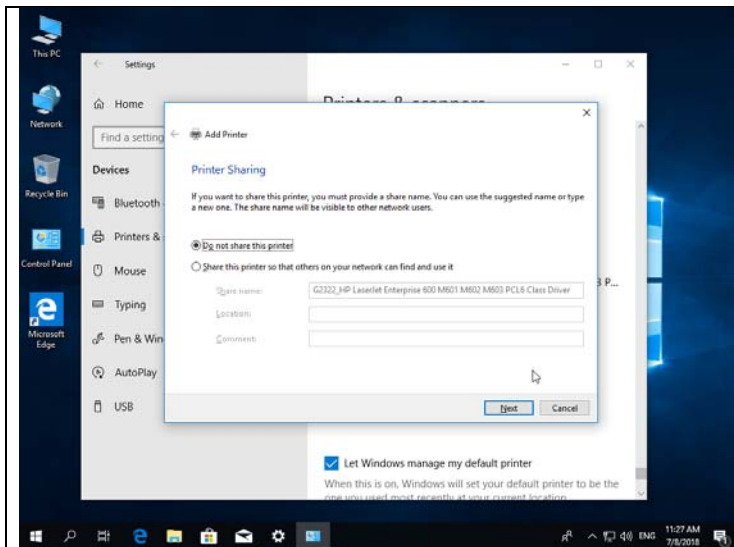

Choose appropriate printer driver. PCL driver is preferred.

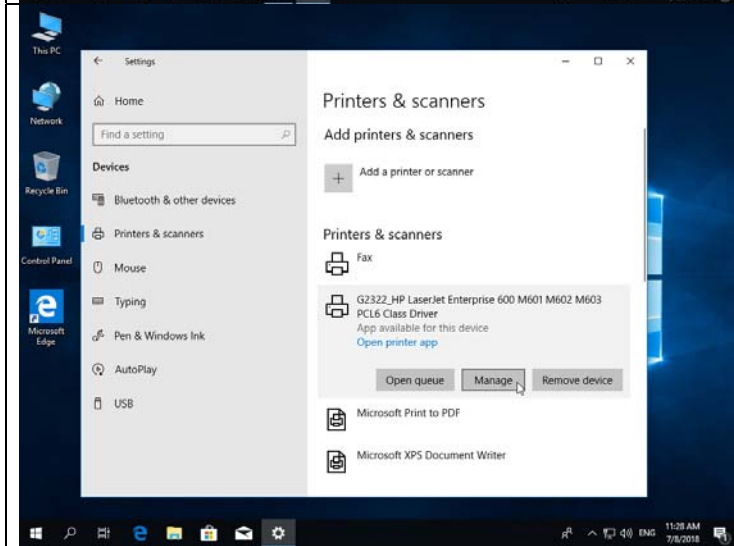

Go to manufacturer web site to download drivers if Windows have no suitable drivers. Must choose 64bit driver as the Windows 10 is 64bit.

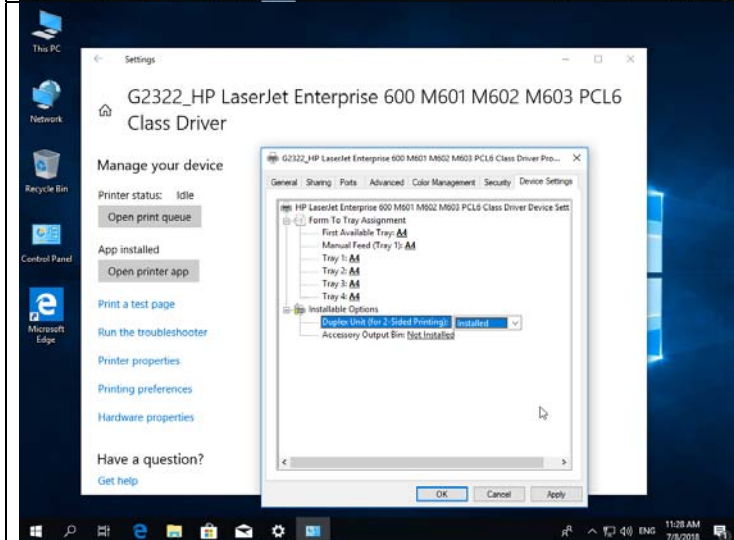

Add your room number before printer name, for easy identification

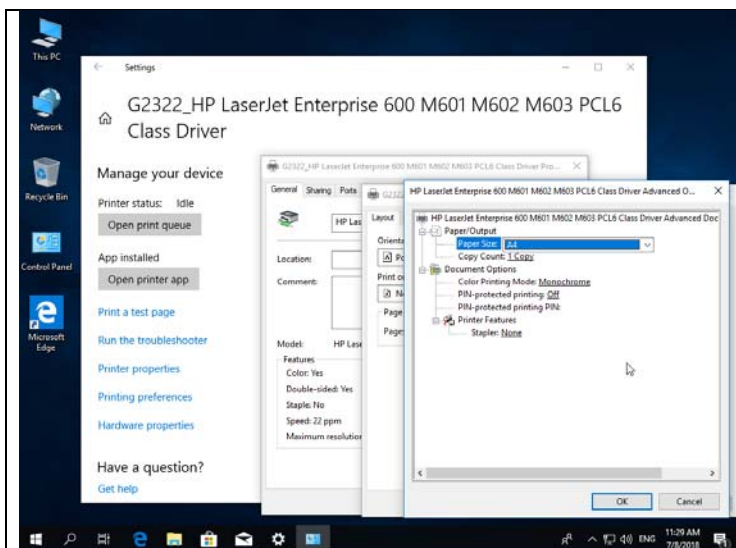

Do not share printer

Click the printer name and *Manage* button, then *Printer properties*

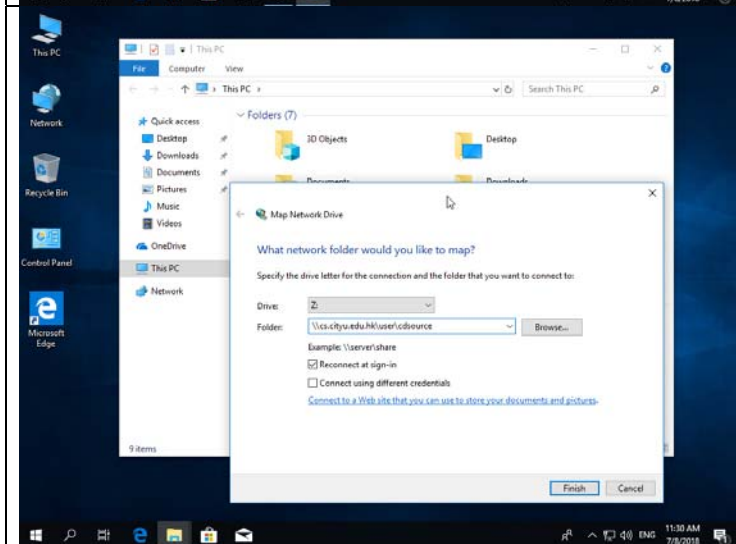

Make sure all paper size are A4, and duplexer installed (for two-side printing)

Map a driver to

\\cs.cityu.edu.hk\user\cdsource

for our software library

**For those folders you can enter, you
can install those software inside**
