

Integrated VPN Gateway GlobalProtect VPN Client Setup Guide (For Mainland User)

Section I: GlobalProtect VPN Client Installation

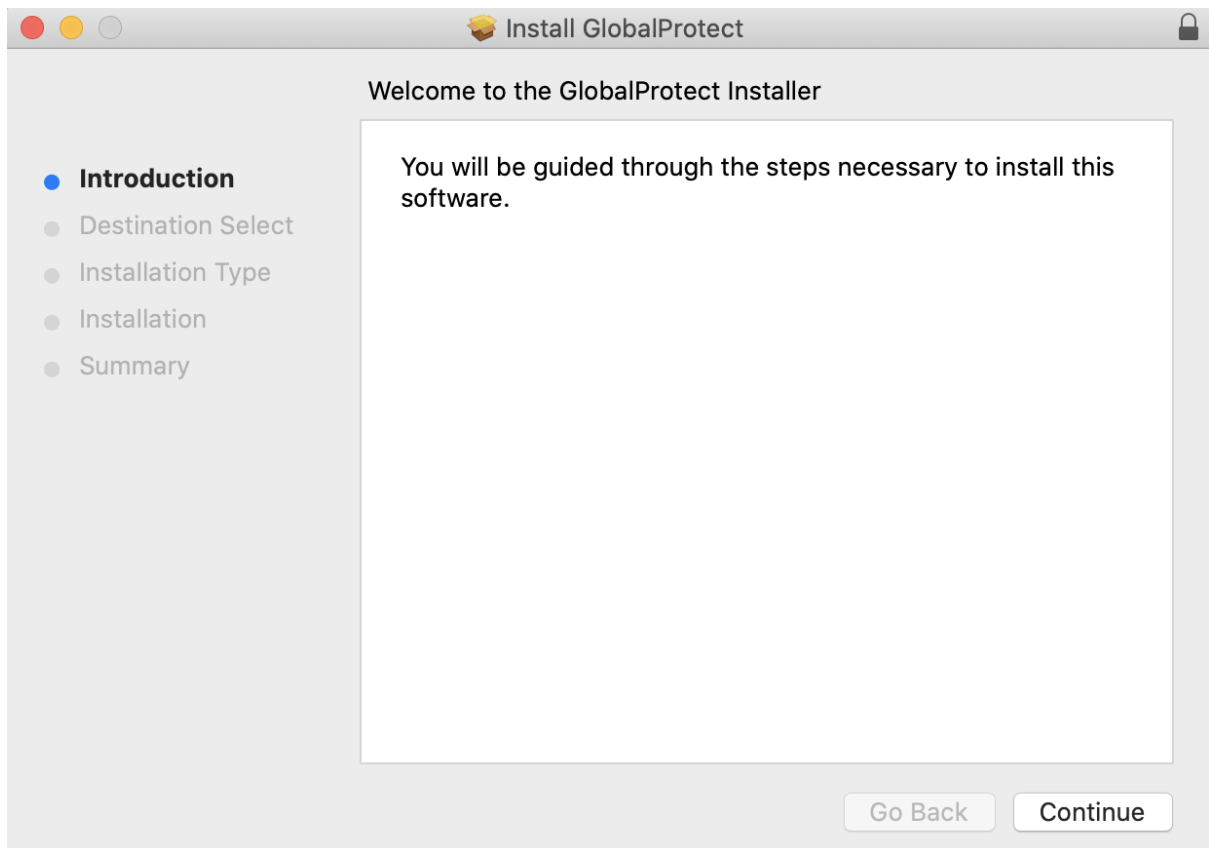

1. Use a web browser to navigate to the Integrated VPN Gateway webpage
“https://119.23.175.47”. Login with your EID and password.

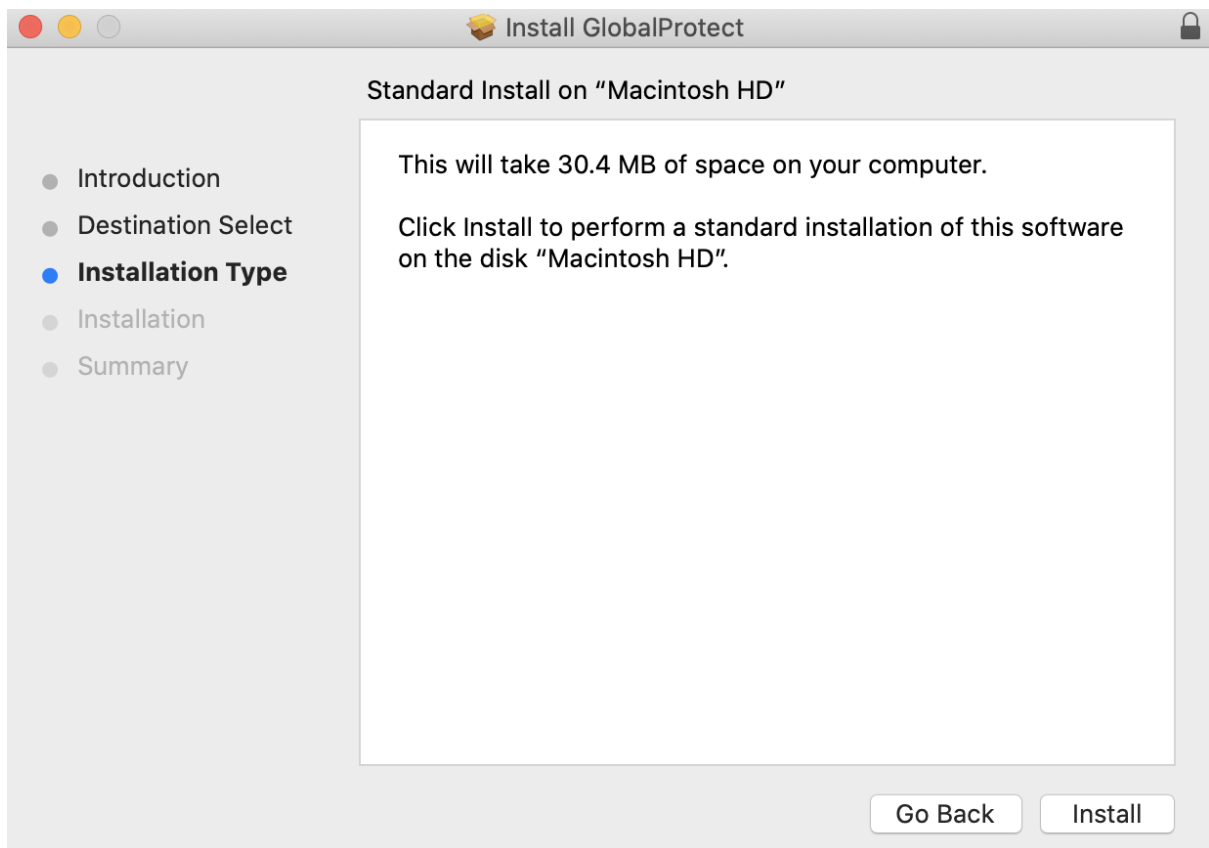

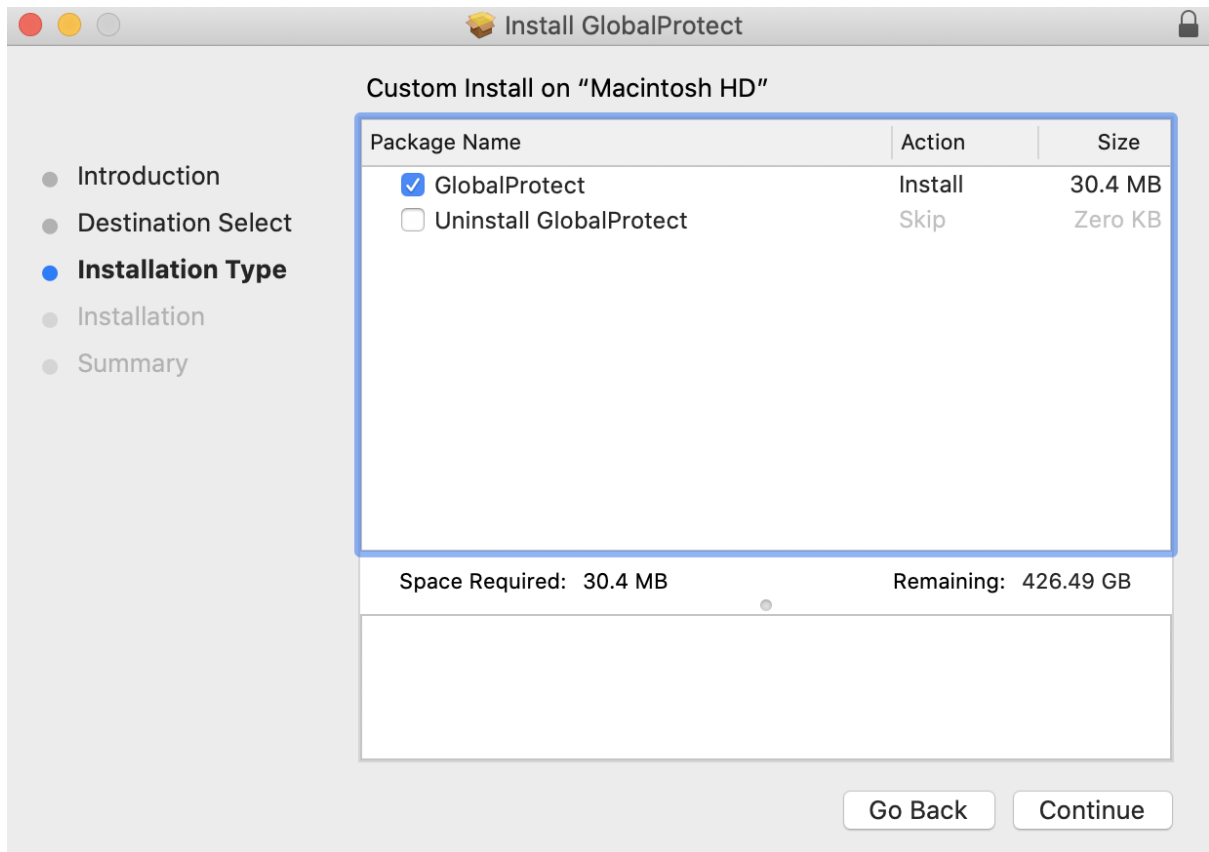

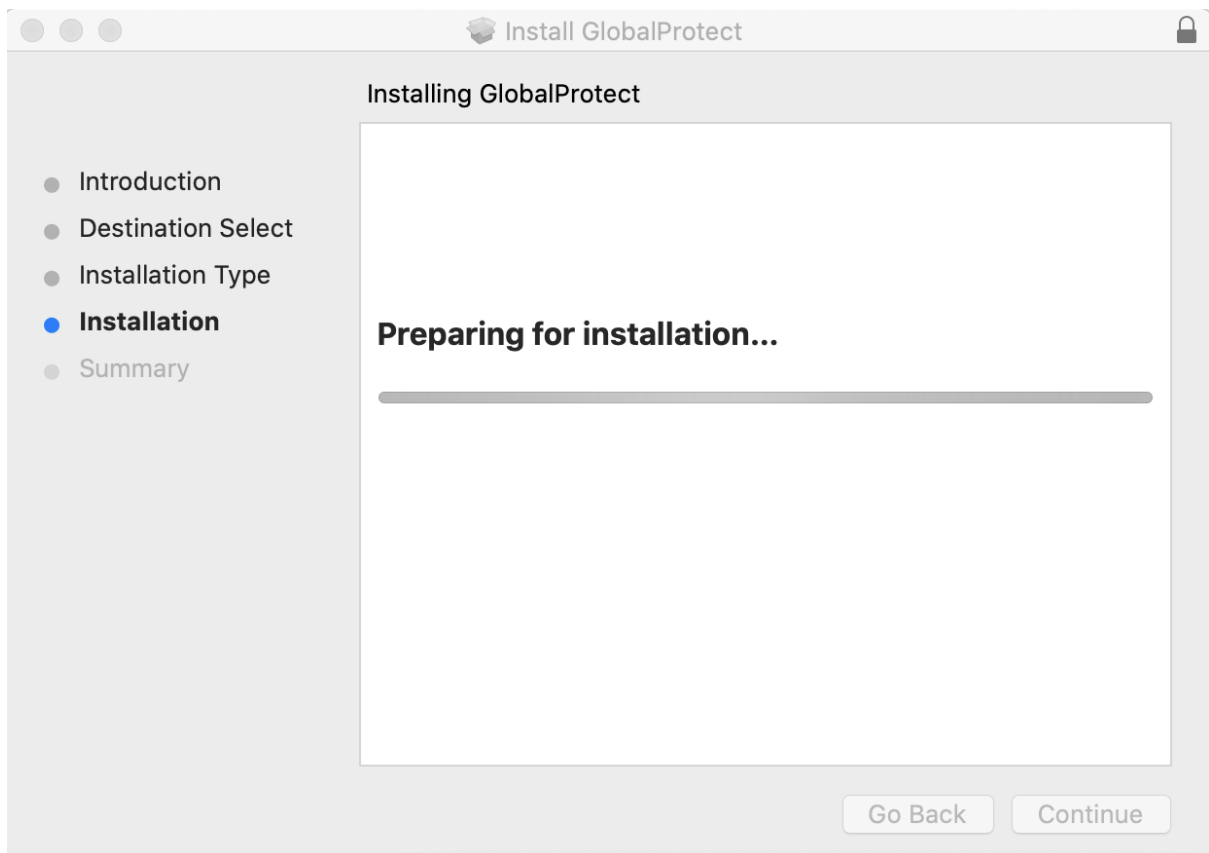

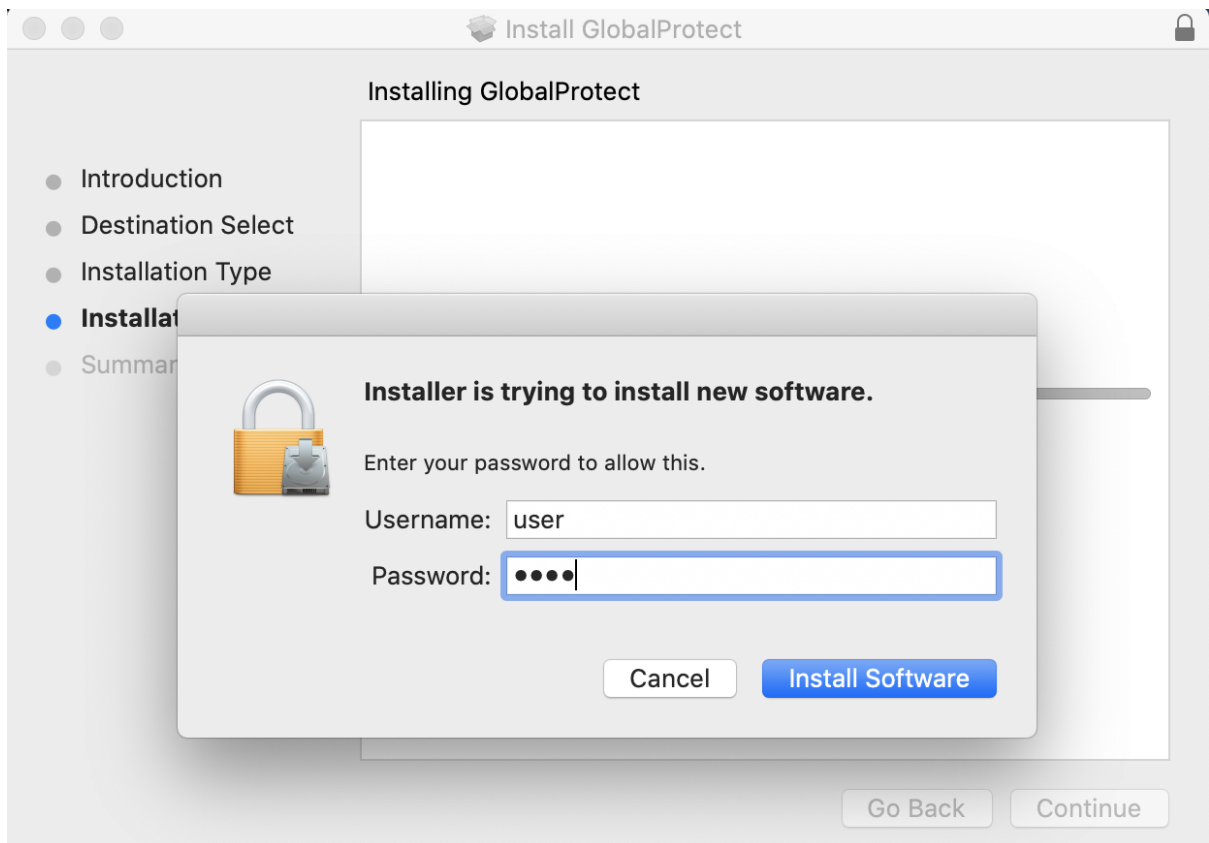

2. Select the “Download Mac 32/64 bit GlobalProtect agent” file.

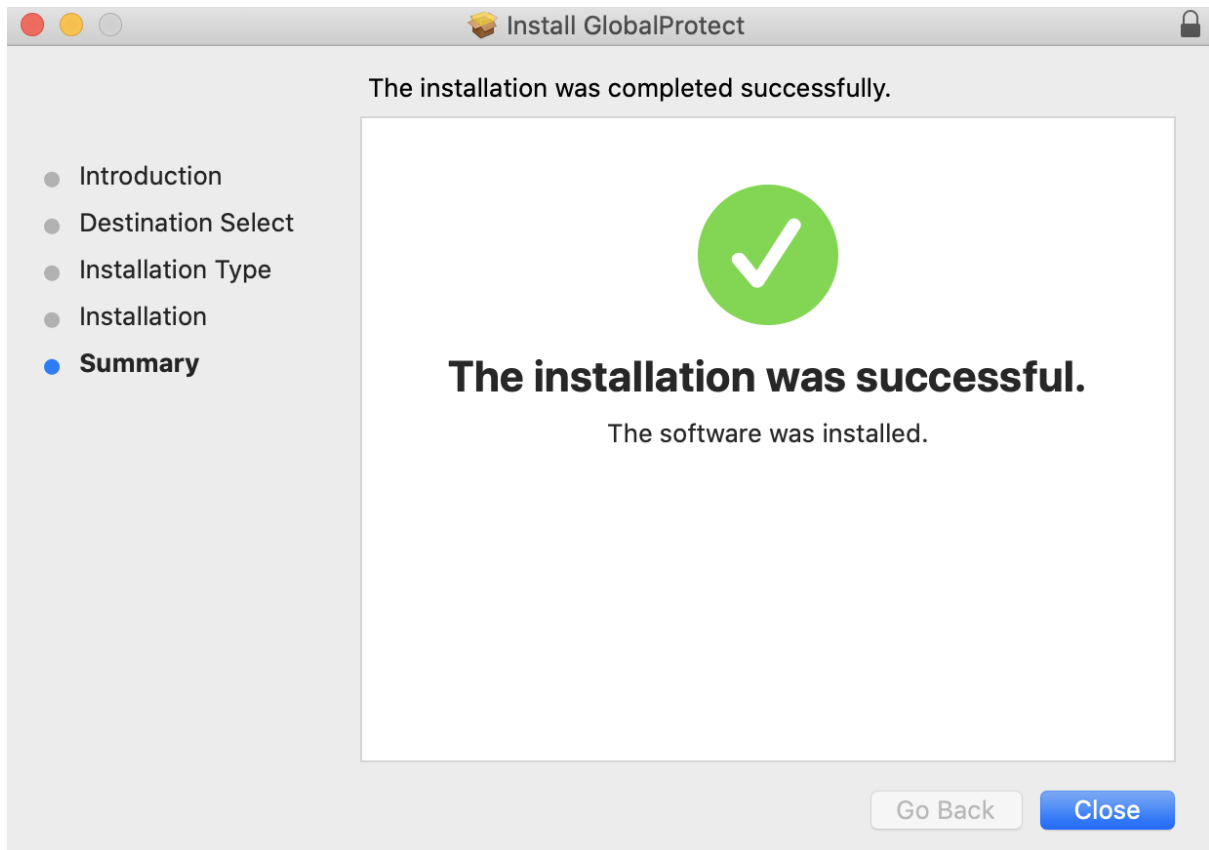

3. Open the desired installation file. Accept the default settings for the remaining screens, clicking “Continue” and “Install” buttons until you complete the installation with “Close” button.

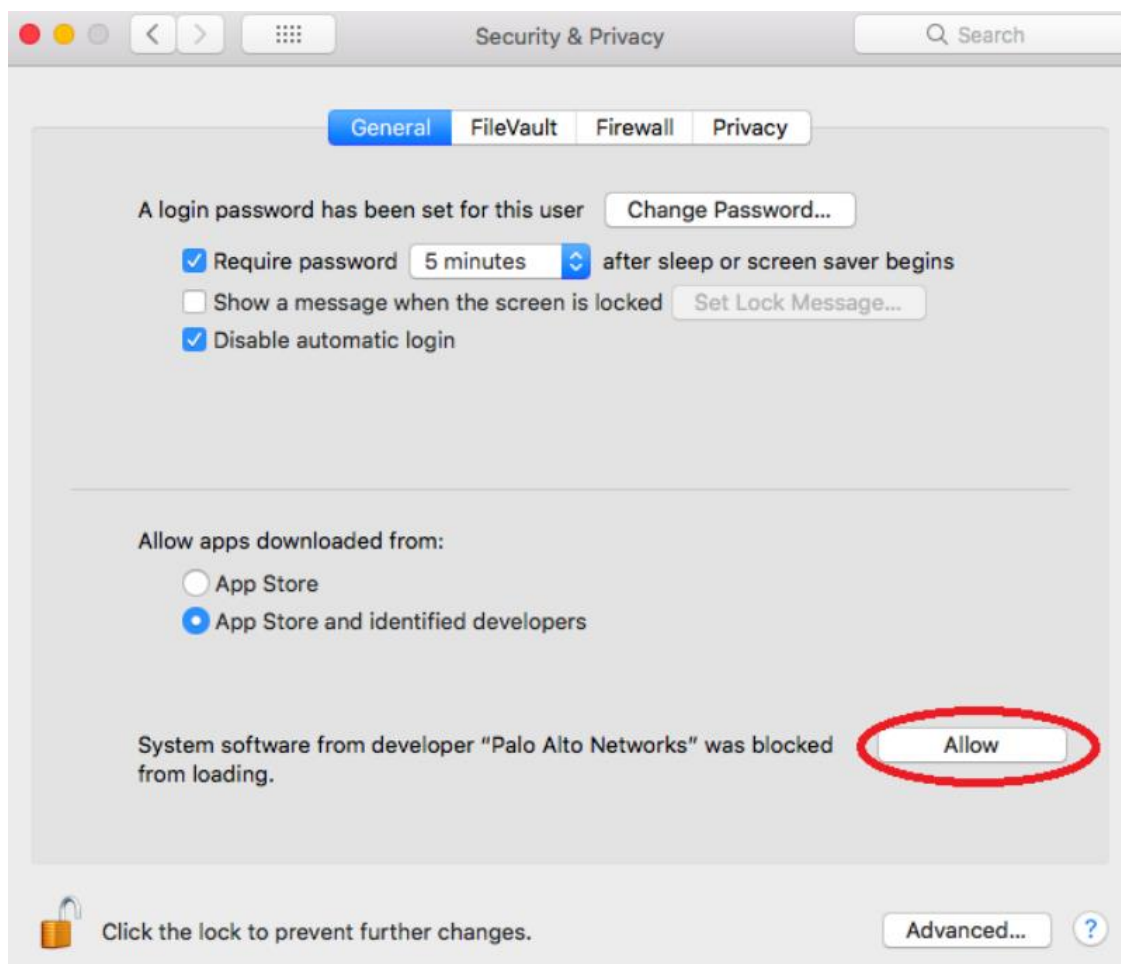

4. If you got the following screen “System Extension Blocked”. (If you have not, please skip this step.)

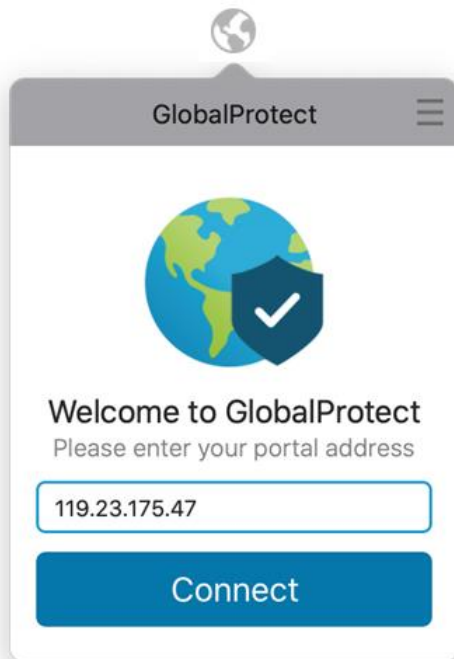

Please open to the “**System preference**” -> “**Security & Privacy**”. In the “**General**” tab, you will see the message “**System software from developer “Palo Alto Networks” was blocked from loading.**”, then Click “**Allow**” to grant the GlobalProtect from loading.

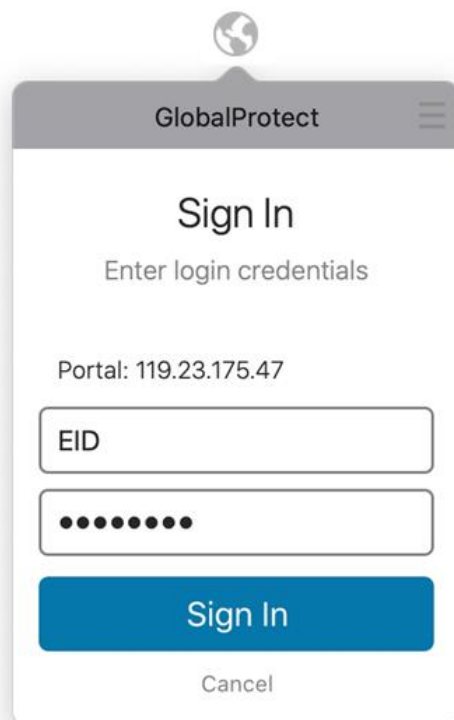

Caution: If the above actions have not performed, the GlobalProtect agent will be stuck and keep loading.

5. Enter the portal address “119.23.175.47” in the fields as shown below and click “Connect” button to connect the VPN server.

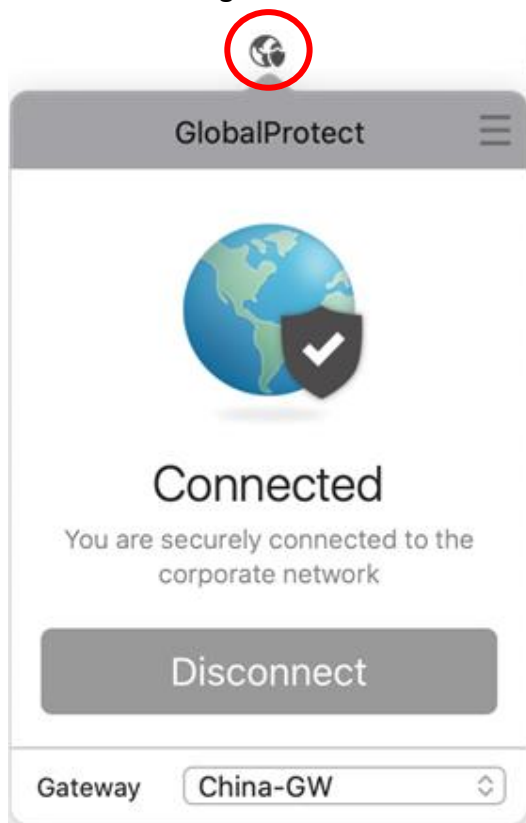

The image shows a mobile application interface for GlobalProtect. At the top, there is a header bar with the text "GlobalProtect" and a hamburger menu icon. Below the header, there is a large blue and green globe icon with a white checkmark inside a blue shield. Underneath the icon, the text "Welcome to GlobalProtect" is displayed, followed by the instruction "Please enter your portal address". Below this, there is a text input field containing the address "119.23.175.47". At the bottom of the screen, there is a large blue button labeled "Connect".

6. Enter your EID, password and click “Sign In”.

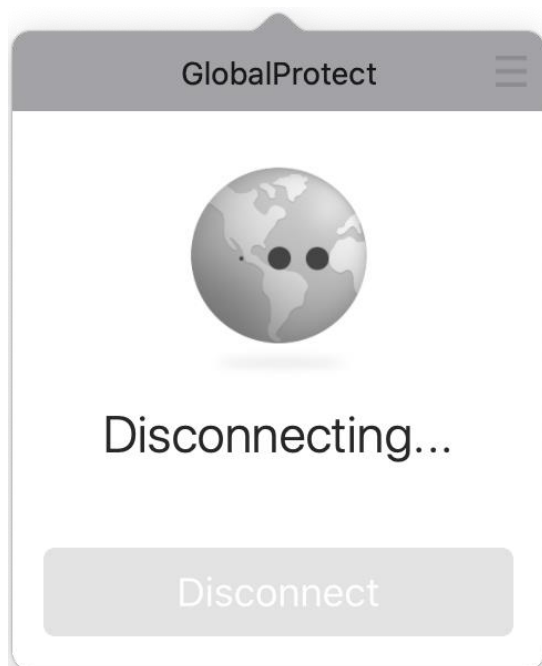

The image shows a mobile application interface for GlobalProtect. At the top, there is a header bar with the text "GlobalProtect" and a hamburger menu icon. Below the header, the text "Sign In" is displayed, followed by the instruction "Enter login credentials". Below this, the text "Portal: 119.23.175.47" is shown. There are two text input fields: the first is labeled "EID" and the second contains a series of dots, indicating a password field. At the bottom of the screen, there is a large blue button labeled "Sign In" and a smaller "Cancel" button below it.

7. The icon will be shown and the connection status will change to “Connected” upon successful login.

8. To terminate the VPN session, you can select the “Disconnect” from the GlobalProtect menu.
